

FOR IMMEDIATE RELEASE**NATIONWIDE BOILER INC. KEEPS PLANT RUNNING WITH
FIVE (5) SUPERHEAT STEAM, TRAILER-MOUNTED
RENTAL BOILERS**

Fremont, California, February 14, 2017.....Nationwide Boiler Inc., the largest rental boiler company west of the Mississippi, recently responded to an emergency need for a long time customer in the Southeast. The customer's large power boiler will require extensive maintenance and repair and until the work is complete, the company will utilize temporary, superheated steam to keep operations running.

Nationwide Boiler received the call on a Saturday afternoon and promptly sent the customer information on multiple boilers available to fulfill their capacity requirements. In less than one week, the order was placed for the rental of five (5) 75,000 lb/hr, 750 psi design / 750F superheat trailer-mounted watertube boilers. Nationwide Boiler quickly serviced each of the five (5) units, which are currently located at a storage facility near the job site. Although the internal process of engineering the site to tie-in five (5) temporary boilers took some time, Nationwide Boiler was able to hold the units for the customer until they were ready to receive them. The boilers are now on-site and being installed.

Nationwide Boiler Sales Engineer Tim McBride stated, "Instances like this is why we maintain a large stock of boilers, in various sizes and in multiples, in our rental fleet. We were fortunate enough to have an adequate amount of 75,000 lb/hr boilers available to meet their demand and provide a solution for our long time, loyal customer."
