

FOR IMMEDIATE RELEASE**NATIONWIDE BOILER TO PROMOTE BOILER SOLUTIONS
AT POWER-GEN MIDDLE EAST**

Fremont, California, January 27, 2012.....Nationwide Boiler Inc., a worldwide supplier of rental boilers, new and reconditioned boiler systems, energy efficiency solutions and environmental controls, will be exhibiting at this year's 10th Annual Power-Gen Middle East trade show (Booth# 6H20). The tradeshow will take place at the Doha Exhibition Center, located in Doha, Qatar, February 6-8. It will bring together leading industry professionals, senior executives, engineers, and operation and maintenance professionals representing power producers, governmental energy departments and agencies, oil and gas operating companies, and industry regulators.

In addition to introducing attendees to new products and technologies, Power-Gen Middle East will provide technical sessions and presentations associated with the Gulf region's power industry, specifically relating to generation, transmission and distribution. The International Energy Agency (IEA) forecasts that \$65 billion will be devoted to energy-related projects in this region's economy over the next five to six years. In addition, growing economic and population urbanization predictors have resulted in increased planning by local governments to build power plants that will meet the growing demand for electricity consumption, expected to increase by 10.8% per year until 2015.

Power-Gen Middle East is owned and produced by PennWell. To receive a complimentary exhibit floor pass to Power-Gen Middle East, please contact Nationwide Boiler at info@nationwideboiler.com.

With worldwide shipment options, Nationwide Boiler offers a complete line of low NOx boilers, mobile rental units and boiler related equipment for rental, short-term, seasonal, emergency use, or for sale and turnkey steam plant projects. The company is a stocking distributor for Babcock & Wilcox FM package boilers and has sales and service agents located throughout the world. Visit Nationwide Boiler's website at www.nationwideboiler.com.

Nationwide Environmental Solutions specializes in the custom design and supply of CataStak™ Selective Catalytic Reduction (SCR) systems for boilers, gas turbines, heaters and furnaces. Technical support and service during installation and start-up is also provided, in addition to operator training and aftermarket services and support. Visit www.catastak.com for additional information.
