

FOR IMMEDIATE RELEASE**NATIONWIDE BOILER INC. CONTINUES TO EXPAND THE
COMPANY'S REPRESENTATIVE NETWORK WORLDWIDE**

Fremont, CA, August 14, 2012.....In an effort to expand worldwide sales, Nationwide Boiler Inc. has recently signed two new representatives that will focus on the rental, leasing and sales of boilers and CataStak™ SCR systems: Dade Hamilton (Coral Gables, FL) and Heat Transfer Specialists (Houston, TX).

Dade Hamilton supplies industrial equipment to the oil and gas, petrochemical, utility, pulp and paper, steel, and sugar industries in Latin America and the Caribbean. This new relationship with Nationwide Boiler will enhance both companies ability to supply new boiler systems internationally, specifically the Babcock & Wilcox Model FM 120-124, 200,000 lb/hr superheated steam package boiler (750 psig / 750°F). As a partner and stocking distributor for the Babcock & Wilcox Company, Nationwide Boiler can ship the Model FM boiler (or any other boiler system in the company's inventory) anywhere in the world.

Heat Transfer Specialists (HTS) specializes in supplying combustion equipment that provides the latest technology in energy efficiency and low emissions. The company serves industrial users in the oil and gas, refining, petrochemical and power industries. Their strategic location in Houston, TX has helped the company grow into a successful manufacturer's representative and they are well positioned to increase Nationwide Boiler's market share in the selective catalytic reduction (SCR) heater market, in addition to providing new opportunities for the sale and rental of boiler systems.

Bill Testa, Nationwide Boiler's Business Development Manager, played a pivotal role in engaging and securing both representatives for Nationwide Boiler. "Dade Hamilton and Heat Transfer Specialists have both proven themselves to be leading suppliers to customers in their territories. They both possess the experience, expertise and continued commitment to serve their customers to the full extent possible, while continuing to add value and unparalleled customer support. Both companies are welcome additions to the company and we look forward to many new opportunities as a result of these new relationships."

Please visit www.dadehamilton.com and www.htstx.com to obtain additional information about products offered by Dade Hamilton and Heat Transfer Specialists. Visit Nationwide Boiler's website at www.nationwideboiler.com to download current boiler specifications and inventory lists, or to learn more about Nationwide Boiler's CataStak™ SCR system for less than 5 ppm NOx reduction.
