

**FOR IMMEDIATE RELEASE****WORLD'S LARGEST TRAILER-MOUNTED BOILER SOLD TO  
A SOUTHEAST BREWERY**

**Fremont, California, January 28, 2016.....**The world's largest mobile, trailer-mounted boiler, previously an active member of Nationwide Boiler Inc.'s rental fleet, has been sold to a brewery in Western Tennessee. The 120,000 lb/hr, 400 psig design saturated steam, Nebraska watertube boiler was originally manufactured in 2005 and had been on a number of short- and long-term rentals. Due to the one hundred plus foot length of the boiler and trailer combination, special transportation permits, pilot escorts and a road survey were required for shipment to the end-user's facility.

The brewery originally contacted Power Equipment Company, Nationwide Boiler's local sales representative in Memphis, TN, looking for a rental or purchase option to replace one of their older existing boilers. Power Equipment Co. and Nationwide Boiler worked together to offer the best solution to fit the customer's requirement. The determining factors for the purchase decision were the immediate availability of a used boiler that was ready-for-service, it could be quickly delivered and installed, and it supported the brewery's expansion plans.

The customer traveled to Nationwide Boiler's headquarters in Fremont, CA to inspect the boiler and ancillary equipment and a purchase order was issued several days later. The equipment has since been delivered to the customer and is currently being installed at their facility. The boiler included an EconoStak economizer for added fuel efficiency.

After delivery, the boiler was removed from the trailer and rolled into its final location in the steam plant on its new, pre-engineered base rails, also furnished by Nationwide Boiler. A replacement boiler for Nationwide Boiler's fleet will soon be ordered and the existing trailer will be re-used for mobilization.

For nearly fifty years Nationwide Boiler Inc. has provided in-stock, new and used firetube and watertube boilers for quick and convenient sales to customers throughout the world. In addition, the company owns one of the largest and newest rental fleets and offers the CataStak™ Selective Catalytic Reduction (SCR) system as a temporary or permanent ultra low NOx emissions reduction solution. Nationwide Boiler provides equipment to varied industrial domestic and international customers including food processing, pulp and paper, petroleum and chemical refineries, colleges and universities, and more.
