

FOR IMMEDIATE RELEASE**NATIONWIDE ENVIRONMENTAL SOLUTIONS’
RE-LAUNCH OF CATASTAK.COM**

Fremont, California, February 18, 2015..... Nationwide Environmental Solutions, a strategic business unit of Nationwide Boiler Inc., has announced the re-launch of its stand-alone website, www.catastak.com. The newly designed website is congruent with Nationwide’s corporate site, but is focused specifically on the emissions reduction and efficiency enhancing equipment offered by Nationwide Environmental Solutions, including the CataStak™ Selective Catalytic Reduction (SCR) System, EconoStak Economizers, and the E²Stak.

Nationwide developed the CataStak™ SCR System for an efficient and cost effective way to reduce NOx emissions to less than 5 ppm, and offers an Ammonia-Free option to eliminate potential ammonia storage and handling issues. The website was developed to educate users on SCR technology and highlights specific equipment that the CataStak™ has been proven to be successful with, including firetube and watertube boilers, fired heaters, and gas turbines, however it is also available for other demanding applications.

The website also includes a section for efficiency upgrades, highlighting EconoStak Economizers, designed by Nationwide to reduce fuel costs by 5% or more, and the E²Stak, which combines the CataStak™ and EconoStak to provide both emissions reductions and increased efficiency in one package.

Nationwide’s Director of Environmental Solutions, Sean McMenanin stated, “Nationwide Environmental Solutions is positioned to provide exceptional performance to meet

the needs of our customers; performance consisting of technical expertise, accountability for achieving each customer's project delivery requirements, and the commitment to drive satisfaction through high quality solutions. We want our website to embody that, and to send our customers a message that we are there for them.”

Nationwide Boiler Inc., founded in 1967, provides a complete line of industrial low NOx boilers, mobile rental units, and boiler related equipment for rental, short-term, seasonal, emergency use, or for sale. The firm's national headquarters are in Fremont, California with sales and service agents located throughout North America. Visit www.nationwideboiler.com for additional details.

Nationwide Environmental Solutions is focused on lowering overall industrial greenhouse gas emissions through innovative ultra low NOx air pollution control and increased efficiency solutions. They specialize in the custom design and supply of CataStak™ SCR systems for boilers, gas turbines, fired heaters, and other demanding applications. Technical support and service during installation and start-up is also provided, in addition to operator training and aftermarket services and support. Visit www.catastak.com for additional details.
