

**FOR IMMEDIATE RELEASE****LARGE STEEL PRODUCER PURCHASES LOW NOX  
WATERTUBE BOILER FROM NATIONWIDE BOILER INC.**

**Fremont, California, March 3, 2014.....**Deacero S.A. de C.V., the second largest steel producer of steel wire worldwide recently purchased a reconditioned 35,000 lb/hr 500 psig design 1992 Nebraska watertube boiler equipped with a Faber low NOx gas/oil burner from Nationwide Boiler. The sale included a Crane deaerator with Carver high pressure feedwater pumps and an energy efficient EconoStak economizer. The boiler and auxiliary equipment will ship to Deacero's manufacturing plant in Ramos Arizpe, Coahuila, Mexico and will be used to supplement the new power island providing the gas turbine with steam augmentation and NOx control.

Nationwide Boiler's representative in Tulsa, Gary Bartlett, was working with Deacero's engineering firm EDG International for almost 9 months, helping them select the right capacity and pressure boiler.

Deacero S.A. de C.V., a private Mexican company owned by the Gutiérrez family in the Monterrey region processes 2.7 million tons of steel a year, and has 14 plants in Mexico, one in the United States, a research and development center in Barcelona, Spain, seven steel scrap yards, 12 distribution centers in Mexico and two in the United States. It employs 6,200.

The company produces products for farming and agriculture, residential uses, building and construction and industrial uses. Deacero has been exporting its products to North America, Central and South America, the Caribbean and Europe for over 25 years.

“Daecero’s recent purchase enables the company to expand its manufacturing capabilities and increase the production of specialized high-value products to other regions worldwide” explained Larry Day, Vice President of Sales and Marketing. “Nationwide Boiler is pleased to be able to provide a solution to a company as successful and established as Daecero S.A. de C.V. and I envision a steady rate of growth for their business based on their solid business experience and manufacturing practices.”

For nearly fifty-years Nationwide Boiler Inc. has provided a complete line of new and reconditioned industrial low NOx boilers, mobile rental units, and boiler related equipment for the metals and mining industry, in addition to all other major industrial processes worldwide. The firm’s headquarters are in Fremont, California with sales and service agents located throughout the world. Visit [www.nationwideboiler.com](http://www.nationwideboiler.com) for details.
