

FOR IMMEDIATE RELEASE**NEW BABCOCK & WILCOX 200,000 LB/HR WATERTUBE
BOILER AND CATASTAK SCR SYSTEM SUPPLIED TO
MAJOR TEXAS OIL REFINERY**

Fremont, California, July 10, 2013.....Nationwide Boiler Inc. was recently awarded a contract to supply a new, in-stock Babcock & Wilcox D type watertube package boiler to a major crude oil refinery in El Paso, Texas. The model FM120-124 boiler is capable of producing 200,000 lb/hr of superheated steam and is designed at 750 psig / 750°F superheat. The plant currently processes approximately 128,000 bpd of crude oil and with this replacement boiler, plant capacity is expected to increase to 150,000 bpd.

Nationwide Boiler facilitated the expedited delivery of the new boiler system in less than six months. The system includes a low NOx burner, an EconoStak economizer, a Nationwide CataStak™ SCR NOx Reduction System (using 19% aqueous ammonia and vaporizer), SIL Level 2 Burner Management System, desuperheater, stack, and FD fan.

“As refineries seek to quickly increase capacity and comply with strict emission regulations, Nationwide Boiler is uniquely qualified to provide in-stock boiler solutions that incorporate the highest standards in safety, efficiency and emission reducing capabilities,” said Larry Day, Nationwide Boiler Vice President, Sales & Marketing. “Our long-lasting relationship with Babcock & Wilcox and other OEM suppliers has enabled Nationwide Boiler to provide the highest quality boiler systems to customers located throughout the world. This project is another example of how we can meet the needs of those customers seeking immediate boiler solutions.”

For nearly fifty-years Nationwide Boiler Inc. has provided a complete line of new and reconditioned industrial low NOx boilers, mobile rental units, and boiler related equipment for the oil refining industry. The firm's headquarters are in Fremont, California with sales and service agents located throughout the world. Visit www.nationwideboiler.com for details.
