

FOR IMMEDIATE RELEASE

**NATIONWIDE BOILER EXPANDS TERRITORY,
NAMED AS EXCLUSIVE BABCOCK & WILCOX
REPRESENTATIVE FOR OREGON AND WASHINGTON**

Fremont, California, August 18, 2025

Nationwide Boiler Inc., a leading provider of industrial boiler systems and solutions, has expanded their exclusive representation of Babcock & Wilcox (B&W) package watertube boilers to include the states of Oregon and Washington. This extension builds on the company's existing territory, which covers the full state of California and select counties in Nevada.

Through this expanded territory agreement, Nationwide Boiler has strengthened its ability to provide both in-stock boiler systems and new, built-to-spec B&W package watertube boilers to industrial facilities across the Pacific Northwest. This added coverage complements the company's extensive inventory of readily available boilers, proven ultra-low NOx solutions, and advanced PLC-based control systems. "This agreement allows us to extend the same trusted B&W products, proven expertise, and attentive customer service our National and International clients have come to expect, to facilities within Oregon and Washington," said Jim Lieskovan, Nationwide Boiler's VP of Sales. "We're committed to delivering reliable, on time steam solutions where and when our customers need them."

Nationwide Boiler maintains a continuously stocked inventory of B&W boilers, including the proven FM120-124, 200,000 lb/hr, 750 psig/750°F superheat package watertube boiler—a design the company has coined the "World Boiler" for its adaptability and performance in installations across the globe. With current manufacturing lead times approaching 54 weeks, this in-stock program ensures faster delivery and reduced downtime for critical projects.
