

**FOR IMMEDIATE RELEASE**

**NATIONWIDE BOILER PARTICIPATES IN ANNUAL PATHWAY  
CONFERENCE WITH STUDENT TOURS OF FACILITY**

**Fremont, California, November 17, 2022**.....Earlier this month, Nationwide Boiler Inc. opened the doors of their Controls Division, Nationwide Control Solutions in Washougal, Washington, to host three groups of high-school students for a tour of their panel fabrication facility. This tour was one of three facilities visited and a small part of a larger event coordinated by Washougal High School. Similar to a career fair, the Annual Pathway Conference provides students enrolled in the Career & Technical Education (CTE) program with valuable insight and education around post-graduation career opportunities with local trades. The goal of the CTE program is to increase graduation rates and prepare students for employment by engaging them in learning related to career interests and workplace readiness.

“We were excited to take part in this event, educating our future workforce on the many opportunities available through trades and specifically within the boiler industry. There are many high-skilled, high-demand and high-paying careers available through trades and it is not well-known to our youth, so it is important that we do all we can to help get the word out,” stated Jack Valentine, Nationwide’s General Manager. “The students had a lot of questions and were eager to learn about everything we do here at Nationwide Control Solutions.”

Each tour at Nationwide began with an education on the company’s breadth of product offerings including temporary rental boilers, new and used boilers for sale, emissions control equipment, and the focus of the tour, combustion control systems and fuel supply skids.

From there, students explored the panel shop and had the opportunity to see electrical wiring, factory acceptance testing, and new equipment fabrication in process. Equipment on the shop floor included a newly built motor control center (MCC) panel for a rental boiler, a urea supply skid for a CataStak™ SCR system, multiple Eagle combustion control panels, and various fuel supply skids. At the end of the tour, students were given the opportunity to take home some promotional 'swag' along with a wealth of new knowledge on control systems and the boiler industry.

Nationwide Boiler Inc. is a leading supplier of temporary and permanent boiler related equipment and CataStak SCR systems for ultra low NOx compliance, serving industrial facilities across the globe. The company's controls division, Nationwide Control Solutions, is a UL-certified panel fabrication facility in Washougal, Washington that specializes in custom PLC-based control panels. Nationwide Boiler is also a stocking distributor as well as manufacturer's representative for boilers and related equipment throughout California, Oregon, Washington, and Texas.
